Summary

Frontend Developer and UI/UX Designer focused on building modern, responsive, and user-friendly web applications using React, Next.js, TypeScript, and Tailwind CSS. Experienced in developing reusable, maintainable React components with hooks such as `useState` and `useEffect` for efficient state management, data fetching, and component lifecycle handling. Skilled at integrating RESTful APIs, designing clean and intuitive interfaces, and testing applications across browsers and devices to ensure stability and usability. Comfortable working independently on freelance full-stack projects, with foundational knowledge of MySQL and ASP.NET.

Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL

Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Framer Motion, Chart.js

Backend & Databases: Node.js, Express.js, MongoDB, MySQL, ASP.NET (basic)

Tools & Practices: Git/GitHub, REST API Integration, Zustand, Responsive Design, Cross-Browser Testing, UX Research, Front-End Design

Projects

E-Commerce Platform | *Next.js, Express.js, MongoDB, Zustand*

- Built a full-stack e-commerce application with Next.js 14 on the frontend and an Express/MongoDB backend for product, cart, and order management.
- Implemented global state management with Zustand for cart and user session handling across the application.
- Designed a responsive, mobile-first UI with clean navigation and optimized page performance.

Real-Time Weather Dashboard | *Next.js, Chart.js*

- Developed a real-time weather dashboard using Next.js 15, fetching and visualizing live weather data through REST APIs.
- Used Chart.js to build interactive, easy-to-read data visualizations for temperature, humidity, and forecast trends.

Personal Portfolio Website | *Next.js, Framer Motion, Vercel*

- Designed and built a personal portfolio site with smooth Framer Motion animations, interactive transitions, and loading states.
- Deployed on Vercel with a focus on performance, accessibility, and polished visual detail.

Project Management System | *React, Vite, Tailwind CSS, Highcharts*

- Built a responsive project management system to track project status and progress, using React and Vite for a fast, modern frontend and Tailwind CSS for a clean, adaptive UI.
- Visualized project progress and status metrics with interactive Highcharts dashboards for quick, data-driven insights.
- Integrated REST APIs to bridge the frontend with the backend, enabling real-time data synchronization between the client and server.

Thakre Municipality Data Collection System | *React, Vite, Tailwind CSS, Highcharts, React Maps*

- Developed a data collection web application for Thakre Rural Municipality, Dhading, built with React, Vite, and Tailwind CSS for a responsive, ward-level interface.
- Integrated interactive mapping with React map libraries to visualize geographic and ward-level municipal data.
- Used Highcharts to present collected data through clear, interactive charts for municipal reporting and analysis.
